DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
It does not identify the citizenship of each inventor.

Specification

2. The disclosure is objected to because of the following informalities: Applicant is requested to add section headings such as "Summary of the Invention" and "Brief Description of the Drawings" to the specification.

Appropriate correction is required.

Drawings

3. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1724

5. Claims 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claim 6 recites the limitation "the desorption device" in lines 3-4. There is insufficient antecedent basis for this limitation in the claim. Claim 7 is rejected for depending from a rejected parent claim.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by the European Patent Application (EP 0005292).

9. EP '292 teaches a process for separating ammonia from a mixture containing ammonia, carbon dioxide and water, comprising separating gaseous ammonia in a rectifier (3), then treating the gaseous ammonia in a condenser (5) that will inherently condense out remaining carbon dioxide (see abstract, figure 2, page 14, col. 6 to page 15, line 10).

10. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Kurpit et al. (3,191,916).

11. Kurpit et al. 916 teach a process for separating pure ammonia gas from a mixed off-gas stream that includes water, carbon dioxide, and ammonia, comprising an ammonia rectification step (32) for producing a stream consisting substantially of gaseous ammonia, and a step of

Art Unit: 1724

condensing carbon dioxide out of the mixed off-gas stream in a packed section (33) (see figure 1, col. 4, line 61 to col. 5, line 68).

Allowable Subject Matter

12. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

13. Claims 6 and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

14. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references listed on the attached PTO-892 form disclose gas treatment processes.
